**Have you had your Health
Check?**

**WOMEN'S HEALTH
ASSESSMENT**

Patient Information Leaflet

Why are you providing this service?

The aim of the assessment is to provide a health screening and promotion opportunity to our female patients at a local level and convenient time.

While women tend to be more proactive than their male counterparts regarding their health there are several female specific health issues that need greater attention as we age. Of particular importance are gynaecological issues, osteoporosis and cardiac disease as menopause approaches.

Who is the assessment for?

We are providing this service for **all female patients** attending the practice. However we particularly encourage those between the **ages of 40 – 70** as they may **benefit most** from a health check.

When is the service available?

The assessment will take place over two planned appointments and

can be arranged daily.

How do I know if I should attend?

The clinic is open to all women who feel they should have a general health check-up.

You may also benefit if...

you are concerned about your diet, exercise, smoking or alcohol intake.

you are under pressure or stress in your work or home life or are feeling fatigued.

you have a family history of any significant medical conditions.

For specific acute symptoms it may be more relevant to arrange a general appointment for one of the GP's first.

What should I expect?

Assessments will involve an initial consultation with our practice nurse. You should attend fasting for

14 hours (overnight). The nurse will review with you your health check questionnaire and undertake your blood tests, a urine test and physical measurements (Blood Pressure, weight e.t.c.)

What happens next?

A follow up appointment, at least one week later, with the doctor will then complete your health assessment. The doctor will complete a physical examination and review the results of your investigations undertaken by the nurse. This will allow you to discuss and plan together for any appropriate treatment or lifestyle changes that may be required.

We are also running a lifestyle clinic for those requiring more intensive one to one intervention on these issues

What do I need to do next?

If you would like to make an appointment simply speak to our receptionist or see our website www.nobbergp.ie.
